

CoreSync

Gateway 60W

The CoreSync Gateway 60W is a low voltage power distribution and network connected module compliant with the IEEE 802.3at standard and Cisco's UPOE standard that utilizes 60W-per-port PoE technology.

This Gateway 60W receives a minimum guaranteed 51 watts of usable power from a PoE Network Switch, ensuring control and secure two-way communication with lights, sensors, and other CoreSync Daisy-Chained devices in a CoreSync-enabled building infrastructure.

FEATURES AND ADVANTAGES

IEEE 802.3at and Cisco UPOE compliant device	Uses low voltage PoE infrastructure for power and communication with lights, sensors, and other devices
Input power up to 60W	Capable of powering a single or multiple CoreSync devices
CoAP network communication	Easy and secure convergence of IP infrastructure
CoreSync Enabled	Daisy-Chain capable with easy connection to all CoreSync devices
UL 2108 listed	Safe operation and industry standard compliance

SPECIFICATIONS

Electrical

Maximum Power Input:	60W at 42-57VDC
Maximum Power Output:	57.5W at 42-57VDC
Nominal Power Input:	51W at 42-57VDC (as per UPOE Standard)
Standby Power Consumption:	1.5W at No Load
Power Consumption at 51W:	2.0W (6.82 BTU/hr)
Power Consumption at 60W:	2.5W (8.53 BTU/hr)

Commercial Standards

PoE, PoE+, UPOE
Class 2 Electrical Device
UL 2108 Listed
CSA22.2 No. 250
FCC Part 15 Subpart B
Plenum Rated (Metal Enclosure)

Product Safety

Internal Over-Temperature Protection
DO NOT hot swap

Mechanical

Housing Material:	Extruded Aluminum (Metal Enclosure)
Length:	117.7 mm (4.63 in)
Width:	53.33 mm (2.10 in)
Height:	25.51 mm (1.00 in)
Weight:	119 g (4.19 oz)
Housing Material:	LEXAN 243R-111 (Plastic Enclosure)
Length:	97.4 mm (3.83 in)
Width:	53.33 mm (2.10 in)
Height:	24.2 mm (0.95 in)
Weight:	79 g (2.79oz)

Environmental

Ambient Temp Range:	0 to 40°C (32 to 104°F)
Storage Temperature:	-40 to 85°C (-40 to 185°F)
Max. case temperature:	90°C for Metal Enclosure; 75°C for Plastic Enclosure
Relative Humidity:	10-80% Non-Condensing
Environmental Rating:	Indoor

CoreSync Gateway 60W

TYPICAL APPLICATION

DAISY-CHAINING

The CoreSync Gateway 60W receives power and data from a PoE Network Switch via Category cable. From the PoE Switch, the minimum guaranteed power at the input of the Gateway 60W is 51W. If the total power requirement on the Gateway is below 51W for the UPOE 60W standard, a single Gateway 60W can power and control multiple LED Drivers, sensors, and other CoreSync devices in a Daisy-Chain configuration, with the easy-to-use input and output connector scheme. Each CoreSync Daisy-Chain device can be powered and physically connected to a CoreSync Gateway 60W with a rugged and reliable Molex CoreSync Harness cable, using a Molex Micro-Fit 3.0 4-pin connection.

The total power budget on the Gateway must comply with the UPOE standard, and considers the load power, power drop on CoreSync devices in the Daisy-Chain—including the Gateway, and interconnect losses. The overall voltage drop and power drop can be calculated prior to the design. Please refer to CoreSync Harness Length Calculator to calculate the maximum run distance.
