

The CoreSync Constant Voltage Driver is a low voltage, DC/DC LED driver for driving Constant Voltage LED engines in a wide variety of light fixtures. Controlled and powered by a Molex CoreSync Gateway.

The CoreSync Constant Voltage Driver can be embedded in a fixture or placed remotely. The Driver is connected to the CoreSync Gateway using rugged and reliable CoreSync Harness.

FEATURES AND ADVANTAGES

| 4 Channel Constant Voltage | Independently controllable, providing a solution for RGBW, CV color tuning, and 4 individual lights |
|--------------------------------------|---|
| Individually addressable | Allows easy discovery, commissioning and control of each driver |
| Integrated power monitoring | Provides valuable energy-use information |
| Thermal Foldback | Driver will decrease LED brightness output if temp too high |
| Dual CoreSync IO connectors | Daisy chain capable, easy connection to all CoreSync devices |
| Euro-Style Detachable Terminal Block | Connector that supports 16-24 AWG wires secured by a screw terminal |
| UL2108 Listed | Safe operation and industry standard compliance |

SPECIFICATIONS

Electrical

LED Output voltage:24V +/-3%Max Output Current:1.8AStandby Power:0.7W

Efficiency:

92% (Typical) at 48V DC input full load

Dimming: PWM

Dimming type:Linear Dimming

Frequency: 20 kHz Dimming range: 1-100%

Product Safety

Output over-current protection
Output over-voltage protection
Internal over-temperature protection
DO NOT hot swap

Commercial Standards

Class 2 electrical device UL2108 Listed, CSA22.2 No.9.0 FCC Part 15 Subpart B

Mechanical

Housing material: Extruded aluminum

 Color:
 Silver-gray

 Length:
 95.10 mm / 3.74 in

 Width:
 42.00 mm / 1.65 in

 Depth:
 18.80 mm / 0.74 in

 Weight:
 98g / 3.46 oz

Environmental

Ambient temperature: 0 to 40°C (32 to 104°F) Storage temperature:

-40 to 85°C (-40 to 185°F)

Max case temperature:

75°C (167°F)

Relative humidity:

10-80% non-condensing

Environmental rating: Indoor

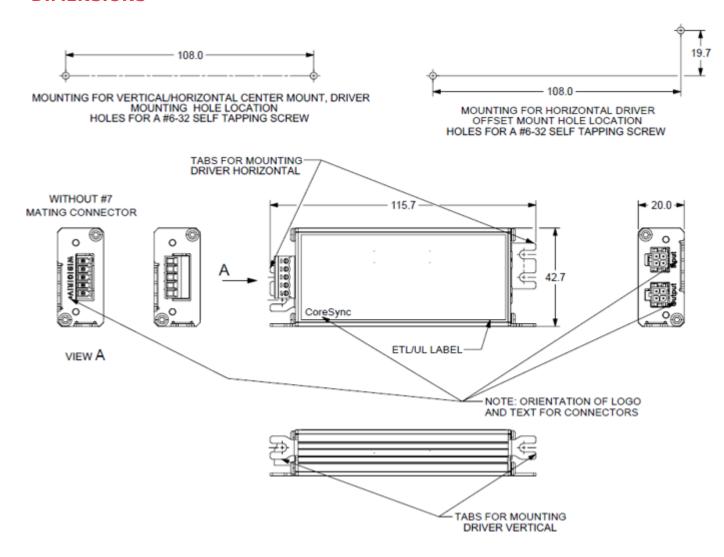

DIMENSIONS

CONNECTION INTERFACES

| Connection | Connection Specifications |
|-----------------|--|
| CoreSync Input | 4-Pin Micro-fit 3.0 connector for CoreSync harness |
| CoreSync Output | 4-Pin Micro-fit 3.0 connector for CoreSync harness |
| LED Output | 5-Position Pluggable Terminal Block (Included) |

CORESYNC IO

LED OUTPUT

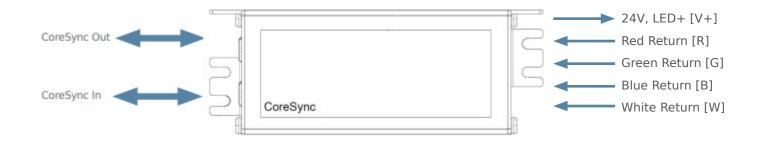

DAISY CHAIN

CONNECTION DIAGRAM

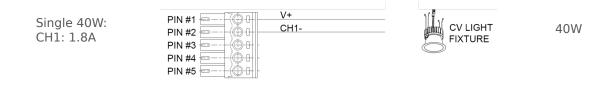

ORDERING INFORMATION

| Order Number | Description |
|--------------|---|
| 1809969004 | CoreSync Compact Driver, Quad, 24V CV |
| 395000005 | 3.50 Pitch Eurostyle Horizontal Plug, 5 Circuits (Included) |

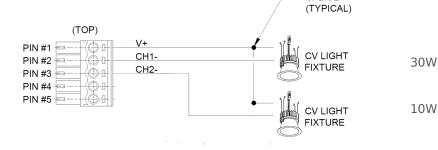

MONO-LIGHT WIRING

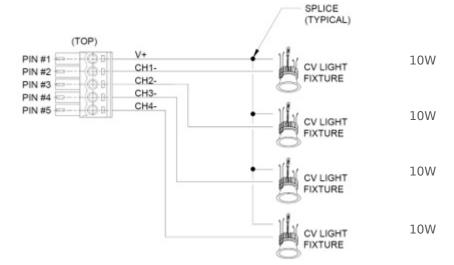

Mono-Lights Combination: CH1: 1.25A

CH2: 0.42A

SPLICE.

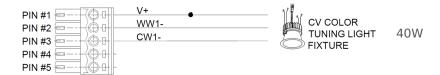

Quad-Mono Light: CHs: 0.42A

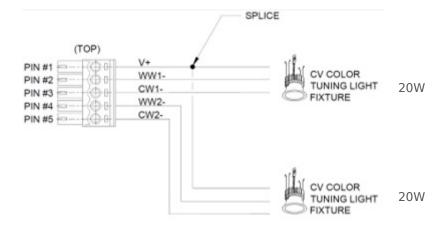

TUNABLE-LIGHT WIRING

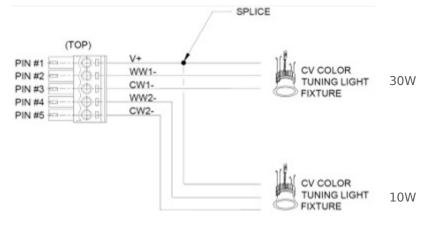

Dual Tunable: CHs: 0.8A

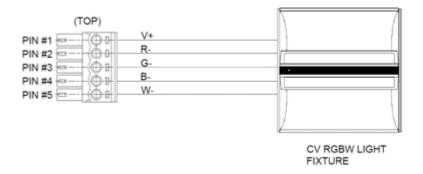

Combination:

CH1: 1.25A CH2: 0.42A

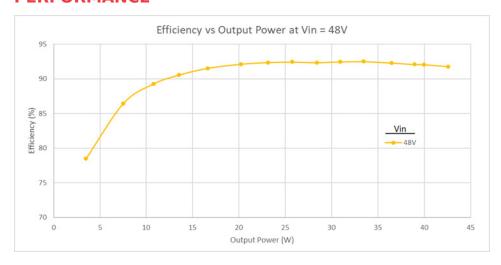

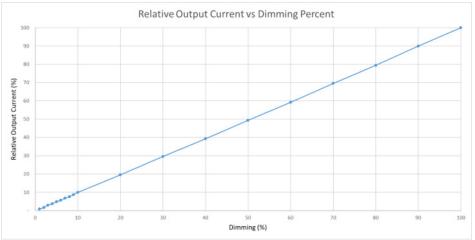

RGBW LIGHT WIRING

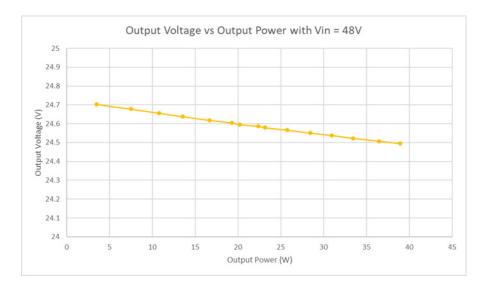

PERFORMANCE

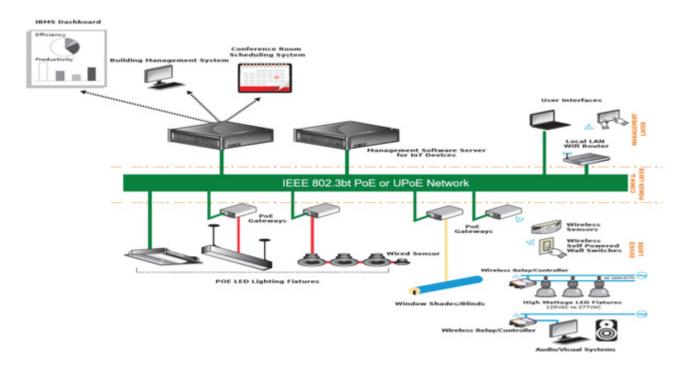

TYPICAL APPLICATION

DAISY-CHAINING

The CoreSync PoE Gateway 90W receives power and data from a PoE Network Switch via Category cable. From the PoE switch, the minimum guaranteed power at the input of the PoE Gateway 90W is 71.3W. If the total power requirement on the Gateway is below 71.3W for the IEEE 802.3bt 90W Standard, single PoE Gateway 90W can power and control multiple LED Drivers, sensors and other CoreSync devices in Daisy-Chain configuration, with the easy-to-use input and output connector scheme. Each CoreSync Daisy-Chain device can be powered and phyically connected to a CoreSync PoE gateway 90W with a rugged and reliable Molex CoreSync Harness cable, using a Molex Micro-Fit 3.0 4-pin connection.

The total power budget on the Gateway must comply with the IEEE 802.3bt Standard, and considers the load power, power drop on CoreSync devices in the Daisy-Chain - including the Gateway, and interconnect losses. The pverall voltage drop and power drop can be calculated prior to the design. Please refer to the CoreSync Harness Length Calculator to calculate the maximum run distance.

For further details please refer to the user guide for this product: <u>UG-1809969004</u>.
