

Features and Benefits

Synergy is an industrially designed family of wall plates, surface blocks and modular furniture outlets with sleek rounded contours that offer an aesthetically pleasing style for even the most contemporary of high technology office atmospheres.

Synergy Surface Blocks are ideal for use in a confined space and open offices. They offer the option of either side or base entry of cables with internal cable management and are mounted using screws. Port identification is clearly visible from the top of the surface block with Snapz icons (option available for 2, 4 and 6 port boxes). Location designation is clearly visible from the top of the surface block with label and clear, hinged cover. Synergy Boxes are offered unloaded, DataGate™ modules must be ordered separately.

- Utilize DataGate Plus Jacks and single-position fiber and copper modules
- Contemporary styling
- Rear loading modules to reduce tampering
- Slotted screw holes for easy alignment and removal
- Snapz port icons (option available for 2, 4 and 6 port boxes)
- Concise labeling
- Hinged screw caps and label covers prevent misplacement
