USO II Uni-Fit
Modular Furniture Outlet

Features and Benefits

The USO II multimedia outlet system is a comprehensive group of modular products which can be easily configured and reconfigured from the front. For maximum versatility, USO II outlets have a three-part design: bezel, fascia and jacks.

USO II modules make it easy to customize outlets for any UTP or fiber application. Modules can be purchased either preconfigured or can be built by purchasing either 1U 1 Port or 1U 2 Port fascia and inserting Single Position Modules, including DataGate Plus Jacks.

The USO II Uni-Fit modular furniture outlet features adjustable latches that accommodate most standard and non-standard modular furniture openings—providing flexibility for hard-to-fit openings. Simply attach the base plate onto the furniture and adjust latches to the opening, slip on the cover, and snap in a USO II module. Each Uni-Fit accommodates up to four voice or data channels (two modules).

- Utilizes USO II modules
- Customize outlets for any situation
- Easily configured / reconfigured from the front
- Utilize Snapz Port Icons
- Concise labeling
- Accommodates DataGate Plus Jacks

Approvals UL 1863

Material Thermoplastic UL94V-0
